WHAT WE STAND BEHIND

- This number names this one skill set and no other, and it is never reused.
- The edition above is frozen: run against it today or in five years and it behaves the same way, or the register says why not.
- Every hour it is in use is counted at source, and the count is the record. What is owed against that count is owed.
- When the term ends, or when the person behind it says stop, the ruled timing applies — It stops for new work at once; a job already underway finishes. Then the copy held under this licence is deleted and the deletion is recorded.
- The source's name stays on it. It is not merged into anything.
- We do not stand behind the machine, the job, or what is produced with it. Those are the licensee's.
